Split-Body Garbage Trucks

C & S Waste Solutions of Lassen County utilizes state-of-the-art, automated, split-body side load trucks to collect trash and recyclables for our Lassen County customers. These trucks have two separate compartments on the inside; one for trash and the other for recyclables, with a divider running down the middle to keep the material separated.

The driver operates the truck's mechanical arm, which lifts the cart, and then he/she flips a switch, which directs the material into the appropriate compartment, keeping the materials separated. Once the garbage side is emptied at the landfill, the driver returns to our local yard with the recyclables, which are then baled, loaded, and taken to a Material Recovery Facility (MRF) for further processing.

These split-body trucks not only enable us to collect two separate materials at once, they offer improved efficiencies, help reduce fuel emissions, decrease wear and tear on our streets, create less noise, and reduce our carbon footprint. So, when you see the same truck collecting your trash and recyclables, don't panic, we've got it covered.

Christmas Tree Collection

During the **first full week of January**, un-flocked Christmas trees will be collected curbside for residential customer pick-ups only. Please place trees next to your cart on your collection day.

Friendly Reminders

Office Hours

Our office, located at 471-825 Diane Dr., Susanville, is open Monday through Friday from 8:00 a.m. to 4:00 p.m.

Collection Days

Please have all carts roadside, with lids positioned to open toward the street, by **6:00 a.m.** on your collection day.

Snow Berm Cart Placement

On your service day, please be sure to place your cart on the **street side of the snow berm for collection.**

Windy Days

On windy days, please place your recyclables in plastic bags to prevent loose items from blowing out of the trucks and into the streets.

The Back of Your Bill

Be sure to check the reverse side of your invoice for more information concerning our services.
